

GINGKO TABLE
INCLUDED
design for everybody

A stylish and practical table for communal activities and everyday dining.

Tested and approved by people with dementia.
Designed and manufactured in Scotland, UK.
Finished by hand.

Materials: Powder coated steel, moisture resistant MDF, scratch resistant melamine face, solid American walnut.

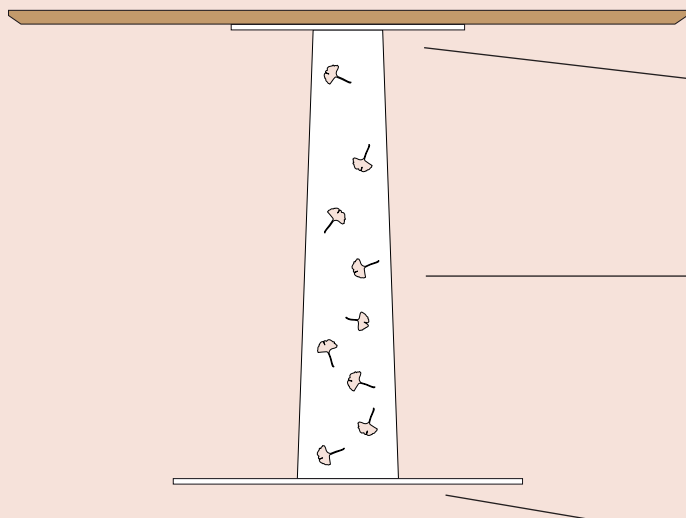

Dimensions: H7400mm W1000mm D1000mm

The problem

Tables with four legs require the user to 'hop' in to get comfortably close and 'hop' back out. Tables with a central leg are often wobbly and leaning on the table could result in spilling drinks.

The solution

The Gingko Table has a central leg to allow diners to swing in and out with ease, including wheelchair users. The steel construction of the central pillar and the solid steel base prevent the table from tilting, even when leaning on it to get up. The solid walnut edging creates a strong contrast for a person with dementia to clearly see the edge of the table.

Reinforcing steel plate

10mm steel plate prevents the table top from tilting.

One central leg

One central pillar allows people to get in and out with ease, including wheelchair users.

Extra solid base

10mm steel plate prevents the table from tipping, even when leaning over it.

Rounded corners

Maximum comfort, no sharp edges, easy for staff to manoeuvre.

Scratch resistant laminated top

Smooth to the touch for everyday use, tough for craft activities.

1x1m table top

Sits comfortably 4 people, but can accommodate 8.
Can be easily joined to other tables.

Solid walnut edging

Beautiful and unique to each table, the wood grain provides a natural feel to complement any interior.
